

Washington Transportation Investment Strategy Committee

Purpose

WSDOT and the MPOs and RTPOs are working as partners to create a collaborative approach for coordinating transportation investment priorities that reflect regional and state transportation policy goals. This will allow the partners to provide the legislature and other decision makers with well-coordinated information on priorities in order to inform their project selection and budgeting decisions.

As a first step, this committee will seek to establish a mutual understanding of:

- Problems and opportunities associated with the current system of prioritizing transportation investments,
- A shared vision of what we want to achieve, and
- Guiding Principles for collaboration.
